### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18, 20, 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 18, it is not clear if the first component is magnetically attached to the second component. In this instance, the claim recites the first component may be selectively attached magnetically to the second component and it is not clear whether the component is attached to the other component.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 10, 11-15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Alonso (US Patent 3,375,604).

The device of Alonso reads on the structural limitations of the claims including a first component (106 and 110), second component (116), magnetic portion (112; it should be noted that element 112 is affixed to first component 110 via 106 and 108), an alignment assembly (108) and a third component (122).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 7-14, 15, 17, 18 and 20-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gray (US Patent 2,587,142) in view of Salosky (US Patent 2,803,920) or Sims et al (US Patent 4,176,492).

Gray teaches in the figures most of the element of the claimed elements including post (46b). However, Gray fails to teach a magnetic portion affixed to the components. Salosky teaches a toy vehicle having parts attached to one another by a magnet (col. 1, lines 49-72). Sims teaches articulated magnetized toy that can be configured to represent a vehicle. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate magnets as taught by Salosky to the toy of Gray for the purpose of movably retaining the components of the toy.
